-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species 1: Figure 8 drawn to a hemispherical shaped tweeter dome with a closed outer end.

Species 2: Figure 9 drawn to a hemispherical shaped tweeter dome with an arched or concave under side.

Species 3: Figure 10 drawn to a hemispherical shaped tweeter dome with an under side having a different shape than the outer surface.

Species 4: Figure 11 drawn to a tweeter dome which is less than a hemispherical section of a sphere.

Species 5: Figure 12 drawn to a hemispherical shaped tweeter dome and a bobbin structure which penetrates the dome.

Species 6: Figure 13 drawn to a hemispherical shaped tweeter dome with an outer skin formed on the core material.

Species 7: Figure 14 drawn to a hemispherical shaped tweeter dome with the bobbin structure penetrating the dome and a skin over the dome and the bobbin structure.

Species 8: Figure 15 drawn to a hemispherical shaped tweeter dome with a skin formed over the bobbin and the voice coil.

Species 9: Figure 16 drawn to a hemispherical shaped tweeter dome with multiple skin

layers.

Species 10: Figure 17 drawn to a hemispherical shaped tweeter dome with a voice coil wound directly on dome extensions.

Species 11: Figure 18 drawn to a silo shaped tweeter dome shaped to mate inside a voice coil bobbin.

Species 12: Figure 19 drawn to a diaphragm cone with an external shell filled with a low mass solid filler body.

Species 13: Figure 20 drawn to a spherical shaped dome.

Species 14: Figure 21 drawn to a compression driver tweeter with an inverted dome.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

A telephone call was made to Richard Calderwood on June 12, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:30 AM - 3:00 PM.
